and the betterment of human character.

Math Curriculum Request

Dear Student and Family,

Congratulations again on being accepted to The Outdoor Academy! To help us prepare for your future math class here, we need to gather more information about the curriculum of your math course at your sending school. This packet includes sending school checklists for all of the math classes we offer. They are separated by both course and semester. Please ***do not*** ask your math teachers to complete each of these checklists! **You need only to find the checklist that aligns with the math course you will be enrolling in during your semester at The Outdoor Academy.**

After finding the form for your math class at OA, take it to *either* your **expected teacher** of that math course *or* the **math department head** at your school. Please ask them to complete this checklist and contact our Math Teachers if they have any questions. We also request a copy of the table of contents of the textbook being used in your course at home that you will be taking while at OA.

If you are planning to enroll in a block course while at OA (meaning you will cover a year of curriculum in one semester, and receive a full math credit), please have your teachers fill out *both* the fall semester and spring semester forms for that class. The completed checklists may be mailed, faxed, or emailed to our office **as soon as possible so we may begin planning your curriculum**. If you or your teachers have any questions about completing the math checklists, please contact me, Academic Dean, Katie Harris, at katie@enf.org. These forms can also be found on the Student Forms page of our website. (<http://www.enf.org/outdoor-academy/oa-student-forms/>)

THANK YOU!

Katie Harris

Academic Dean

828-877-4349 xt. 21

Forms may be mailed to: The Outdoor Academy, 43 Hart Road, Pisgah Forest, NC 28768
Faxed to: (828)884-2788 or Emailed to: admissions@enf.org
