Overview of Academic Forms

Fall 2022 and Spring 2023

Dear Student and Family,

We are so excited for you to engage in the transformative academic experience that is a semester at The Outdoor Academy. To help us prepare to meet your curricular needs and give you the best semester possible, we need some information from you.

Below is a checklist of the three main academic forms you should submit to OA in advance of your semester. All items are available on the [Enrolled Students](#) page of our website.

1. Sending School Information & Final Course Selection
 - Here you will pick from any optional classes and include details to help with transcripts and credit transfer (i.e. credit weight). This two-page form will need to be signed by your academic advisor and a school administrator.
2. Math Curriculum Form
 - **Algebra 2, Geometry, and Precalculus** students should complete the form for the correct class and semester (Fall Precalculus, Spring Geometry, etc.) to assist in matching our curriculum to what you've been learning. This form should be completed by either the **expected teacher** of that math course or the **math department head** at your school. We also request a copy of the **table of contents of the textbook** being used in your course at home.
 - **Math 3** students do **not** need to complete a form, but we do request a copy of the table of contents of your class textbook.
3. Spanish Curriculum Form
 - This form should be completed by either your **expected teacher** of that Spanish course or the **Spanish department head** at your school.

These completed forms should be emailed or faxed to our office **as soon as possible** so that we may begin planning your schedule and curriculum. Based on your submissions, there may be other forms or information requested of you. If you or your teachers have any questions, please contact me at emily@enf.org.

Thank you,

Emily Cava Northrop
Academic Dean
828-877-4349

Completed forms should be emailed to
admissions@enf.org or faxed to 828-884-2788
