Overview of Academic Forms

Fall 2023 and Spring 2024

Dear Student and Family,

We are so excited for you to engage in the transformative academic experience that is a semester at The Outdoor Academy. To help us prepare to meet your curricular needs and give you the best semester possible, we need some information from you.

Below is a list of the three main academic forms you should submit to OA well in advance of your semester. All items are available on the [Enrolled Students](#) page of our website.

1. [Sending School Information & Course Selection](#)
 - This is the main form to focus on. Based on your sending school's academic calendar, you will be able to pick from any optional classes and include details to help with transcripts and credit transfer (i.e. credit weight). This form should be completed online and will email a PDF copy to you. The PDF will need to be signed by your academic advisor and a school administrator.
2. Math Curriculum Form
 - [Algebra 2](#), [Geometry](#), and [Precalculus](#) students: the appropriate form should be completed by either the **expected teacher** of your math course or the **math department head** at your school. This will help you compare your home curriculum to OA's curriculum.
 - **Math 3 Block** students do **not** need to complete a form, but we do request a copy of the table of contents of your class textbook.
3. [Spanish Curriculum Form](#)
 - This form should be completed by either the **expected teacher** of that Spanish course or the **Spanish department head** at your school. This will help you compare your home curriculum to OA's curriculum.

These online forms should be submitted **as soon as possible** so that we may begin planning your schedule and curriculum. Based on your submissions, there may be other forms or information requested of you. If you or your teachers have any questions, please contact me at emily@enf.org.

Thank you,

Emily Cava Northrop
Academic Dean
