

# EAGLE'S NEST CAMP HANTE ADVENTURES CORE VALUES

## **Community**

Our programs encourage simple living, rooted by intentional experiences and connection to community. Our community is one of equality, where all participants and staff are treated with respect and kindness, and are valued for the unique people they are. Each individual plays a vital role in daily life at camp and is a responsible and valuable part of the greater whole.

## **Confidence**

We strive to create opportunities that provide our participants and staff the confidence needed to become their best selves. By creating a community of compassion, each individual is encouraged to venture beyond their mental, emotional, and physical comfort zones. They are celebrated for their successes *and* failures, as each provide avenues for personal growth.

## **Compassion**

We intentionally create a nurturing, inclusive environment that encourages compassion and empathy. Each individual is valued for their contributions to our community, and all are treated with respect and kindness. We care deeply for each other and all aspects of the world in which we interact.

## **Nature**

At the heart of the Eagle's Nest experience is a deep connection to nature and a strong belief in the transformative elements found in wilderness and adventure experiences. Participants and staff are encouraged to forge personal relationships with the natural world through exploration of our campus and beyond.

## **Joy**

An overwhelming sense of joy crowns each of our programs. We strive to nurture a joyful community that inspires participants and staff to carry happiness in their hearts long after they leave our campus.
